PROTECTS PCS, MODEMS AND ALL PERIPHERALS

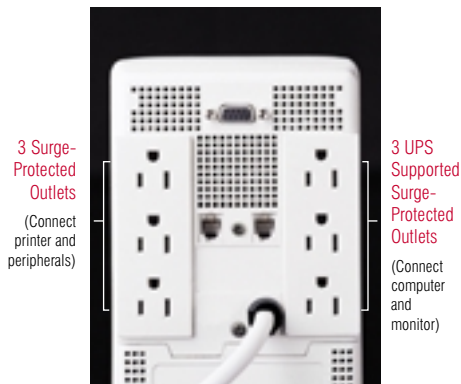

- Protects PCs & All Peripherals**
 Unique design features 6 surge-protected outlets (3 of which also provide battery backup for your critical equipment). Connect and protect all your equipment (computer, monitor, printer and peripherals) with one UPS.
- Protects Your Online Equipment**
 Protects against surge damage on up to two modem/fax lines.
- Maintains Your Internet Connection**
 Allows you to work online through short blackouts or safely shut down during longer ones.
- Protects Against Lightning and Surges . . . Guaranteed**
 Stops damaging surges and filters disruptive line noise. Ultimate Lifetime Insurance guarantees protection for life!

All-In-One Protection For PCs And Peripherals

Protect your entire office with one Internet Office UPS System. Many UPS systems have too few outlets or become overloaded when connected to laser printers or other power-hungry peripherals. Internet Office UPS Systems feature three unique surge-only outlets in addition to three UPS and surge protected outlets. Use the surge-only outlets to plug in power-hungry equipment—even laser and inkjet printers—eliminating the need for additional surge suppressors. During power outages, your computer and monitor receive battery-backup power, and your remaining peripherals are protected by reliable, multi-level surge protection.

Unique Outlet Design

3 Surge-Protected Outlets
 (Connect printer and peripherals)

3 UPS Supported Surge-Protected Outlets
 (Connect computer and monitor)

Protection For Online Systems

If you rely on the Internet, rely on Internet Office UPS Systems for complete online protection. By using your telephone line to access the Internet you have opened a "back door" for damaging surges to enter your equipment. Internet Office UPS Systems feature built-in surge-protected RJ11 phone jacks to close this "back door" and safeguard your modem and other communications hardware, virtually bullet-proofing your online PC against power problems. The INTERNET OFFICE 500 and 700 models stop surges on two phone lines simultaneously, making them ideal for 2-line homes and offices. In addition to protecting your equipment against surges online, backup power maintains your Internet connection during blackouts.

Complete Power Protection

Internet Office UPS Systems give you everything you need to protect your computer system in a single box. Internet Office UPS Systems provide complete protection against all types of power problems (brownouts, blackouts, surges and line noise). Up to 700 VA of battery backup gives you time to save your open files and safely shut down your computer in the

(continued on back)

event of a prolonged brownout or a blackout. Select models feature a built-in serial port that works with FREE PowerAlert Software* to automatically save open files during a blackout. In addition, Internet Office UPS Systems stop damaging lightning and surges. \$25,000 Ultimate Lifetime Insurance coverage guarantees your critical equipment will stay safe from surge damage for life!

*Available FREE as a website download.

Advanced Power Condition Warnings

Internet Office UPS Systems' microprocessor-controlled warning lights alert you to potential power problems before they affect your equipment.

A) AC Line Voltage: UPS is providing your equipment with surge-protected AC line power.

B) Using Battery: UPS is providing your equipment with battery power during a blackout or brownout.

C) Battery Low/Replace: Indicates low battery charge.

D) Building Wiring Fault: Indicates dangerous faulty outlet wiring at your facility.

E) AC Line Voltage & Using Battery: UPS is providing your equipment with surge-protected AC line power. Flashes when UPS is providing your equipment with battery power during a blackout or brownout.

F) UPS Overload & Battery Low/Replace: Capacity of UPS battery supported outlets has been exceeded. Flashes to indicate low battery charge.

LEDs on each model:

A and B (BC INTERNET 300);

A, B and C (INTERNET OFFICE 500 and INTERNET OFFICE 700);

A, B, C and D (INTERNETOFFICE300 and TM 500);

E and F (INTERNET350 and INTERNET525).

FEATURE FOCUS

Internet Office UPS Systems provide more power protection and more user convenience:

Modem/Fax Protection

Built-in RJ11 jacks stop lightning and surge damage on up to two phone lines simultaneously!

INTERNET350 and INTERNET525 models feature a built-in splitter that allows you to connect and

protect two devices that share the same phone line.

Automatic Data Protection

A built-in serial port connects select models to a PC or workstation. Use

with FREE PowerAlert Software* and included cabling to automatically save open files and shut down equipment during an extended blackout.

* Available FREE as a website download.

Convenient Battery Replacement Door

Tripp Lite UPS batteries will protect your equipment for several years

with normal use. Select models feature a removable panel for convenient battery replacement.*

* INTERNET OFFICE 500 and INTERNET OFFICE 700; INTERNET350 and INTERNET525.

Undermonitor Design With Individual Outlet Switches

The TM 500 features a low-profile console to support any monitor. A single master switch and individual outlet switches provide greater control over connected equipment.

Widely-Spaced Outlets

Select models feature outlets that accept multiple transformers without blocking access to other outlets.*

* INTERNETOFFICE300, INTERNET OFFICE 500 and INTERNET OFFICE 700; INTERNET350 and INTERNET525.

Compact Designs

Compact designs on select models conserve space on or under any desk or mount on wall.*

* INTERNETOFFICE300; INTERNET350 and INTERNET525.
